Dear Parent/Carer,

Re: Use of hand sanitiser in school

As you are aware, we have made the use of hand sanitiser the main way students will clean their hands at school at regular intervals during the current Covid-19 situation. This is consistent with government guidance. This is the most practical method for us to use, given that we have a very large number of students, because of the relative number of hand basins we have on site and to ensure we have sufficient time for students to study the full curriculum. We have tried to avoid a situation where students are standing in long queues for wash basins across each day.

If you have any concerns about your child using hand sanitiser in school, please note that skin-friendly skin cleaning wipes can be used as an alternative. **Please kindly consult your supplier on the most suitable product of hand sanitiser or skin-friendly skin cleaning wipes to kill the current virus.**

If you are unhappy about your child using hand sanitiser or skin-friendly skin cleaning wipes in school, please kindly contact your child's Progress Leader to further discuss the matter.

Best wishes,

P.Kelly
Headteacher
